

In response to the dialogues with experts

We will accelerate LOTTE's unique sustainability activities towards achieving a happier future

Our business is supported by relationships with various stakeholders. We will incorporate the external opinions and advice, and looking forward continue to evolve our sustainability activities and information disclosure.

We are maintaining ongoing dialogues with experts. Based on the advice we have received so far, we have added goals concerning plastic packaging to our new sustainability targets. In the most recent expert dialogue, we received many positive responses regarding our efforts to develop LOTTE's new sustainability goals together with the future generations who will support the company going forward.

Additionally, we also heard that our beloved brands and products have the power to connect people and foster communication. By engaging a wide range of stakeholders in LOTTE's uniquely approachable sustainability initiatives, we will continue striving to create a sustainable society.

To achieve this, we need the help of each and every employee. Employees with diverse values will collaborate with various internal and external partners to promote activities aimed at achieving the goals set forth in the "LOTTE MIRAI CHALLENGE 2048," and so we look forward to your continued support.

Emiko Sugai

General Manager at
Sustainability Promotion
Department
LOTTE CO., LTD.
